

SportHill Fabrics

Quality fabrics are the basis for fine garments. SportHill chooses only the best – testing wearability, longevity and comfort. We also work with the fabric industry to develop exclusive fabrics for use in our clothing. Only after extensive field testing is a fabric accepted into SportHill's product line and offered to our valued customers.

SportHill exclusive fabrics:

3SP, **DriTech**, **MicroBlok**, **MicroLite**, **MicroRip**, **Sensatech** and **Swift**

85% Polypropylene, 15% Lycra
8.8 oz. / sq. yd.

Super-soft and densely spun polypropylene, we call this the miracle fabric because it performs so well in a wide variety of conditions. It's the perfect balance of wind resistance, breathability, evaporation, insulation and ventilation. The soft interior and added stretch make this fabric the ultimate single layer protection for cold and extreme conditions.

3SP is a trademark of SportHill, Inc.

CoolMax® Crepe

100% polyester
3.2 oz./sq. yard

This lightweight quick wicking fabric offers super support and ultimate comfort. Found in all our shorts with liners.

63% cotton, 19% polyester, 15% nylon, 3% spandex
3.3 oz./sq. yard

CP stretch is a lightweight soft, durable fabric. Light enough for running yet durable enough for rugged outdoor adventure. Find CP Stretch in the Trailblazer and Xpress shorts.

CP Stretch is a trademark of SportHill

DriTech™

93% polyester, 7% Lycra
5.8 oz. / sq. yard

Super blend of polyester/Lycra provides excellent stretch. The inner rip texture allows moisture to be siphoned away from the skin, keeping the body cool when things heat up. Super durable and soft; this fabric looks great after years of wear.

DriTech is a trademark of SportHill, Inc.

DryLine®

63% nylon, 23% polyester,
14% Lycra – 6.0 oz. / sq. yd.

DryLine® Lite

71% nylon, 12% polyester,
17% Lycra – 5.5 oz. / sq. yd.

This tri-component fabric features a push-pull moisture transport design, drawing perspiration from the skin to the garment surface, where it evaporates. This combination of nylon, polyester, and Lycra prevents heating up or cooling down too quickly.

DryLine is a Milliken, Inc. registered trademark

100% polyester – 2.4 oz. / sq. yd.

Epic fabric provides foul weather protection and hyper breathability from the inside out. Epic by Nextec is the encapsulation of individual fibers with a hyper-breathable barrier inside the fabric that protects you from driving rain, mushy snowpacks and bracing winds. It is comfortable, soft, quiet and seriously breathable.

Epic is a trademark of Nextec

MicroBlok™

100% polyester microfiber
with Teflon – 3.1 oz. / sq. yd.

MicroBlok with DWR is a tightly woven polyester microfiber fabric that is extremely soft, supple and quiet. It provides an outstanding balance of water repellency, breathability and wind protection. Lightweight and packable for quick reaction to rapid changes in weather conditions.

Microblok is a trademark of SportHill, Inc

Micromattique

100% Polyester with Durepel

Water and stain resistance and breathable, soft, quick drying, lightweight and packable.

Micromattique is a trademark of Dupont

SportHill reserves the right to make inline changes to both the design and fabrication of our products during the year to improve the performance of our clothing.

Microlite™

100% polyester
2.1 oz. / sq. yard

This quick drying, ultra-cool fabric is lightweight and perfect for warm weather conditions. Breathable and silky-soft, it is a favorite for hot summer workouts.

Microlite is a trademark of SportHill, Inc.

MicroRip™

100% polyester – 2.9 oz. / sq. yd.

MicroRip is a lightweight, quick drying, durable polyester with the softness and lightweight of microfiber.

MicroRip is a trademark of SportHill, Inc.

POWER DRY®

100% polyester – 5.1 oz. / sq. yd.

Polartec 100 Power Dry is a combination of thermal protection and moisture management that's designed to provide optimum comfort and protection in a wide variety of climate conditions. Moisture is rapidly wicked away from skin to the outer surface of the fabric keeping the body core dry and comfortable.

Polartec Power Dry is a Malden Mills registered trademark

POWER DRY® with X-Static® Fiber

Power Dry® with X-Static®

100% polyester with X-static
4.9 oz. / sq. yard

A fiber system that uses silver for anti-microbial and thermodynamic properties. It is also safe (no chemicals) and will last the lifetime of the garment.

X-Static is a registered trademark of Noble Fiber Technologies, Inc.

Sensatech™

100% polyester – 3.3 oz. / sq. yd.

Sensatech is SportHill's own lightweight, soft, breathable fabric that quickly wicks and evaporates moisture away from the skin to keep you cool in hot weather and dry when you heat up!

Sensatech is a trademark of SportHill, Inc.

91% polyester, 9% Lycra
8.5 oz. / sq. yard

Swift Technology offers the essential balance of insulation, breathability, moisture wicking and wind block for high octane winter sports. This no-bulk fabric works exceptionally well as a base layer for extreme winter weather or activities. Swift is also a great single layer mid-weight fabric for chilly, less-extreme days and activities. A super-soft, insulating, weather blocking fabric.

Swift is a trademark of SportHill, Inc

TriPlex HT™

40% polyester, 26% acrylic,
22% rayon, 12% Lycra
7.25 oz. / sq. yard

This new compact component fabric is tightly knit which creates a soft cottony feel. The combination of polyester and Lycra wicks moisture from the skin super fast. Triplex HT is a non-pilling, lightweight, quick wicking, super soft fabric that offers extreme comfort during aerobic activity.

Triplex HT is a trademark of Dyersburg

WIND PRO®

100% polyester

The tight knit construction of Wind Pro is 4 times more wind-resistant than conventional fleece, but still is very breathable for active sports. The water repellent surface sheds rain and snow and dries quickly

Wind Pro is a trademark of Malden Mills
